

The main Operating Groups that make up Aveng are:

Aveng Grinaker-LTA

Aveng Grinaker-LTA offers multidisciplinary services across the construction and engineering value chain to its clients in South Africa, Mozambique, Mauritius and other selected markets in the rest of Africa. Services range from building, civil engineering and earthworks, to mechanical and electrical engineering. Aveng Grinaker-LTA also offers a range of water treatment solutions with expertise in design, construction, operations and maintenance of permanent and modular water treatment plants.

McConnell Dowell

Australian-based McConnell Dowell is a major engineering, construction and maintenance contractor experienced in delivering complex projects in the building, infrastructure and resources industry sectors, with expertise in building, rail, civil, electrical, marine, mechanical pipelines, fabrication, tunnelling and underground services. The subsidiary operates in 23 locations throughout Australia, Asia, New Zealand, Pacific Islands and the Middle East.

Aveng Mining

Aveng Mining is one of only four deep-level shaft-sinking companies worldwide and is involved in all aspects across the mining value chain, ranging from shaft sinking, underground development and contract mining, open cut mining, mineral processing and acid mine drainage plants, to construction of mining related infrastructure and the supply of mining equipment and products.

Aveng Steel

Aveng Steel supplies a wide range of products to the domestic and export markets in the steel construction and automotive industries from its steel yards, processing centres and manufacturing plants.

Aveng Manufacturing

Aveng Manufacturing manufactures and supplies construction products to the construction sector, services and engineered solutions to mining, water, oil and gas and construction clients, and rail construction and maintenance services to the transport sector.

Aveng Capital Partners

Aveng Capital Partners is the investment and structured financing arm of Aveng. The company focuses on originating, developing, structuring and investing in general infrastructure, power and real estate projects in South Africa and selective economies in Sub-Saharan Africa.

Commitment to sustainable development

Sustainability in one form or the other touches every aspect of our business and is therefore critical to our success. We are transparent about our commitments, standards and performance requirements and report annually on our progress through our sustainability report, which is available on our website.

How Aveng contributes
to the water sector

HOME WITHOUT HARM
EVERYONE EVERYDAY

Aveng in water management

Since the 1970s, the percentage of Earth's land area stricken by serious drought has more than doubled. Aveng assists its clients by providing innovative solutions, using more efficient technology and infrastructure to help conserve fresh water resources.

Aveng is active in the water and environmental services and solutions market in Africa and Australia and is well placed to expand its footprint into the rest of Africa and the Middle East.

The Group has deployed significant projects from engineering and construction to supply infrastructure related water services and solutions for a number of clients including acid mine drainage and desalination plants. It has also constructed major dams and water related infrastructure and its services cater to clients' storage, distribution, treatment and disposal requirements.

The Group's water and environmental services span the full spectrum of water technologies including lime softening, clarification, filtration, activated carbon adsorption, activated sludge processes, and membrane-based industrial and drinking water plant design.
