AVENG MINING

About Aveng

For more than 125 years, Aveng has evolved in character, capacity and reach and continues to make its mark across the globe. Its origins lie in modest construction projects but Aveng, a leader in infrastructure, now boasts expertise in steel, engineering, manufacturing, mining, concessions, public infrastructure and water treatment. With its broad exposure across the infrastructure value chain, Aveng is able to deliver complex, multi-disciplinary projects in key sectors, including water, power, buildings, process and industrial, roads and rail, oil and gas, marine and mining.

Aveng Mining is an operating group of Aveng. The growth strategy of Aveng, which is focused on building and maintaining a robust, enduring business for the benefit of all its stakeholders, recognises mining as a key strategic sector. Currently close to 40% of Aveng's revenue is derived from mining related activities (including construction work). Aveng is well positioned in this sector with its strong and expanding geographical footprint and breadth of capability. Aveng is involved in all aspects across the mining value chain, ranging from shaft sinking, underground development and contract mining, open cut mining, mineral processing and acid mine drainage plants, to construction of mining related infrastructure and the supply of equipment and products to the mining sector.

About Aveng Mining

Aveng Mining's experience spans a broad range of commodities and it has worked successfully in remote and difficult locations. Aveng Mining offers specialised services to the industry, from turnkey solutions in design and process, to shaft sinking, underground development, contract mining and surface mining, and construction of mine infrastructure. Through Aveng Mining Shafts & Underground, Aveng is a world leader in the shaft sinking and access development market.

Aveng Moolmans

- One of the largest surface mining contractors in Africa and currently works on a number of projects across the continent
- Began open cut mining in late 1970s and moves up to 20 million tonnes of material each month
- Experience in operating in remote and challenging locations, together with extensive resources, ensures delivery of a world-class mining services
- Offers a complete surface mining capability with over 40 years' experience in both hard and soft rock environments, from short-term waste mining and bulk earthmoving to a complete and long-term mining solution
- In addition to drill, blast, load, haul and dump functions, we are well placed to provide mine planning, surveying, production scheduling and grade control services
- Owns and operates a diverse fleet of mining equipment to suit various operations and client requirements
- OSHAS 18001:2007, ISO 90001:2008 and ISO 14001:2004 certified

Aveng Shafts & Underground

- Has the ability to sink and equip both vertical and decline shafts of various diameters to depths of 2,000 metres plus through all types of rock formations
- Technical expertise and resources to deliver multi-disciplinary projects that include design work, civil works and mechanised mining
- Capabilities include the manufacturing and installation of headgears, surface infrastructure and sinking stages
- Has extensive experience in coal, platinum, gold, copper and manganese mining, encompassing board and pillar methods as well as the expertise to undertake any metalliferous mining venture, from conception to execution and completion
- Ability to offer innovative and client-tailored solutions, as well as ensuring that all operations are conducted to the highest quality and safety standards
- ISO 9001:2008 OSHAS 18001:2007 and ISO 14001:2004 certified

Sustainability

An enduring commitment to sustainable development is encapsulated in Aveng's mission, which is to leave **"a positive and lasting legacy"**. Aveng is committed to ensuring the wellbeing of the communities in which it operates and safeguarding precious environmental resources by identifying and implementing innovative business solutions that minimise its impact on the natural environment.

Safety a priority

Safety is a core value and integral to the way we do business. Aveng has developed, implemented and continues to manage a best practice safety programme that strives for Zero Harm. This is achieved by:

- Entrenching safety as a core value, never to be compromised in the pursuit of any other objectives
- Identifying and managing risks
- Meeting and exceeding relevant legal and other requirements.

As such, the value Aveng places on the safety of employees, subcontractors, partners, host communities and any visitors to its sites is reflected in the safety vision **Home Without Harm Everyone Everyday**
