Aveng in Power

Based on its extensive experience and capability, Aveng has a significant contribution to make to the future expansion of the power industry in Africa, Australia, Asia, New Zealand and the Pacific Rim.

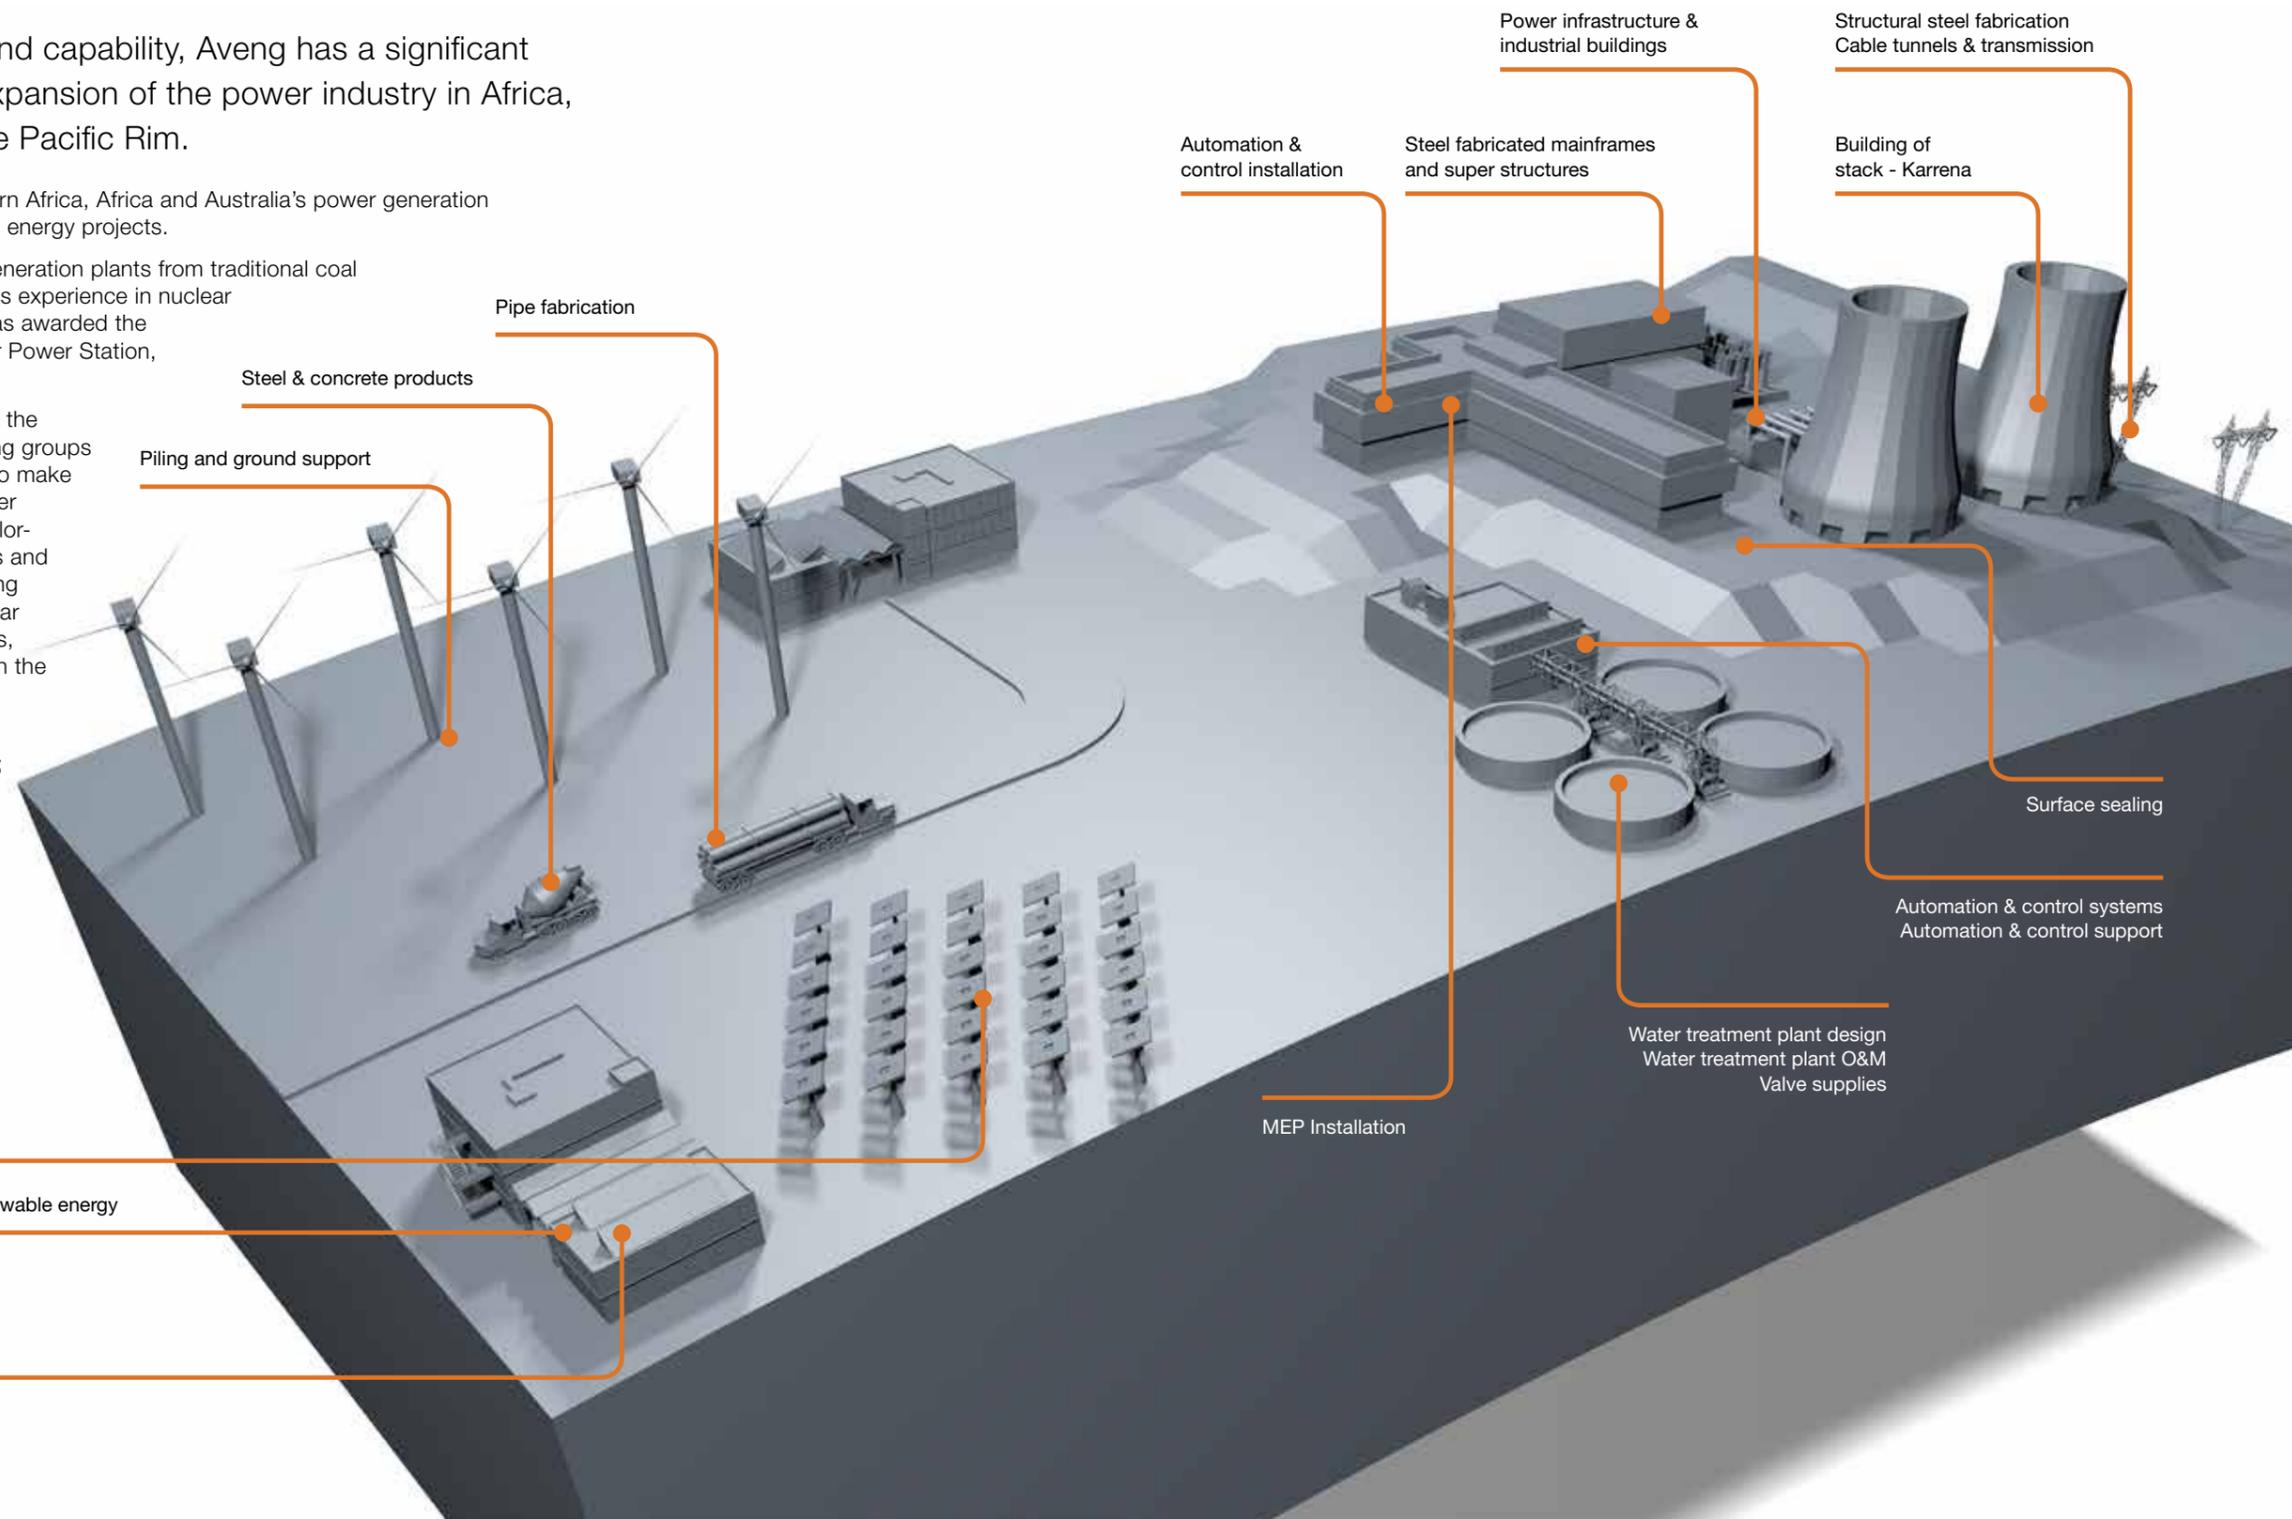

Aveng has already played a significant role in southern Africa, Africa and Australia's power generation capacity and has the capability to deliver large-scale energy projects.

Aveng's experience spans the spectrum of power generation plants from traditional coal powered to hydro power, solar and wind farms. It has experience in nuclear power, having formed part of the consortium that was awarded the contract for the construction of the Koeberg Nuclear Power Station, the first nuclear power plant in South Africa in 1976.

The company has leveraged its vast resources, from the comprehensive skills-sets across its various operating groups to partnerships with external specialist companies, to make a significant contribution to the development of power generation infrastructure. It has the ability to craft tailor-made packages which reduce its clients' risk profiles and resource requirements. With its skills in the structuring and development of project finance deals, in particular concession contracts and public private partnerships, Aveng is also well placed to add value to its clients in the power sector.

Services include all types of building contracts; a comprehensive portfolio of civil engineering services; maintenance, repair and slipforming of industrial chimneys, stacks and ACC columns; concrete preservation, repair and rehabilitation; mechanical, piping, electrical and instrumentation installations and commissioning; engineering design, draughting and fabrication of structural steel and platework.

Through its various operations, Aveng is able to provide operations and maintenance services in the various sectors it operates, including the power and renewable energy segment.

Concessions

Operate and maintain capability in renewable energy

Power project EPC

Strong brands servicing a diversity of sectors

The main Operating Groups that make up Aveng are:

Aveng Grinaker-LTA www.avenggrinaker-lta.co.za

Aveng Grinaker-LTA offers multidisciplinary services across the construction and engineering value chain to its clients in South Africa, Mozambique, Mauritius and other selected markets in the rest of Africa. Services range from building, civil engineering and earthworks, to mechanical and electrical engineering. Aveng Grinaker-LTA also offers a range of water treatment solutions with expertise in design, construction, operations and maintenance of permanent and modular water treatment plants.

McConnell Dowell www.mcconnelldowell.com

Australian-based McConnell Dowell is a major engineering, construction and maintenance contractor experienced in delivering complex projects in the building, infrastructure and resources industry sectors, with expertise in building, rail, civil, electrical, marine, mechanical pipelines, fabrication, tunnelling and underground services. The subsidiary operates in 23 locations throughout Australia, Asia, New Zealand, Pacific Islands and the Middle East.

Aveng Mining www.avengmining.co.za

Aveng Mining is one of only four deep-level shaft-sinking companies worldwide and is involved in all aspects across the mining value chain, ranging from shaft sinking, underground development and contract mining, open cut mining, mineral processing and acid mine drainage plants, to construction of mining related infrastructure and the supply of mining equipment and products.

Aveng Steel www.avengsteel.co.za

Aveng Steel supplies a wide range of products to the domestic and export markets in the steel, construction and automotive industries from its steel yards, processing centres and manufacturing plants.

Aveng Manufacturing www.avengman.com

Aveng Manufacturing manufactures and supplies construction products to the construction sector, services and engineered solutions to mining, water, oil and gas and construction clients, and rail construction and maintenance services to the transport sector.

Aveng Capital Partners <http://www.aveng.co.za/operations/aveng-capital-partners>

Aveng Capital Partners is the investment and structured financing arm of Aveng. The company focuses on originating, developing, structuring and investing in general infrastructure, power and real estate projects in South Africa and selective economies in Sub-Saharan Africa.
